

Have you had problems with finding ticks on your dog?

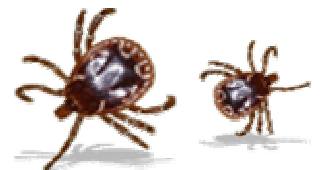

Do you find ticks even if you are using a flea/tick product monthly?

Then new **Certifect™** flea and tick control from Merial may be the answer to your problem!

Certifect™ is a combination of the ingredients in Frontline® plus amitraz – a drug which help kill ticks faster.

Certifect™ will start killing ticks within 6 hours, and completely kill them within 18 hours.

In fact, **Certifect™** actually causes ticks to detach from the dog!

Certifect™ is not for every dog – we assess risk factors to determine if it's right for your dog. In many cases, Frontline® alone is sufficient to protect your dog from ticks.

Certifect™ may be ideal for your dog if:

- you find ticks on your dog routinely
- your dog spends a lot of time outdoors
- your dog walks/hunts in long grass frequently
- you have found engorged ticks on your dog while using Frontline®
- you have a big tick problem in your area

Scott County Animal Hospital has recently started carrying this exciting new product! Please call or stop by to discuss the tick killing power of **Certifect™** today.

Certifect™ is NOT for use on cats – amitraz can be toxic to cats – please do not apply to cats!
